MESSAGE FROM THE DEAN

At O.P. Jindal Global University, world-class does not merely signify that we have a global faculty, global curriculum, and excellent infrastructure. Neither does it just mean that we rank in the top 700 of the QS World University Rankings and nor does it mean that we have been recognised as an Institution of Eminence. For us, being world-class means that we remain connected to our roots while we allow our eyes, mind, and heart to be open to all that the world has offer. It means imbuing our students with lifelong learning skills for taking on the world as it is. A world that requires people to think quickly, critically, and creatively. Across our thirty five undergraduate programmes and twelve schools, our students are encouraged to develop a sense of curiosity, openness and self-reflection, to take up social and civic responsibilities, to respect diversity of societies and cultures, while adhering to the highest standards of ethical behaviour. Our students are also engaged beyond the classroom-making a difference to the local community, engaging in sports, taking part in intellectually stimulating debates, discussions and seminars, volunteering and speaking at conferences, acting and producing plays and musicals, organizing cultural festivals and much more. A holistic and inter-disciplinary education is the need of the hour and at JGU, we encourage students to dream big and find ways to make those dreams a reality. I hope that you will make the best use of this opportunity to study at India's First Multidisciplinary Global University. The JGU Admissions and Outreach Office and I welcome you to meet our students and staff, and to experience the vibrant campus life.

Welcome to JGU.

BBA (HONS.) FAMILY BUSINESS

Family businesses have played a crucial role in the creation, preservation, and continuance of wealth in India and countries worldwide. In India, family businesses account for 85% of the businesses with a contribution of around 70% in the nation's GDP. Understanding the ever-growing importance of family firms in India, we offer BBA (Hons.) -Family Business programme. The course work imparts an adequate mix of practical and academic training to students by incorporating internships, core and elective courses, and an action learning project. The course work has two primary objectives - Equip students with the skills required to understand the general business environment, and familiarize them with family business dynamics. The curriculum comprehensively considers the skills, competencies & attitude required by scions of family firms as presented in the latest reports such as the 10th PwC Global Family Business Survey.

Need for the Transformation of Family Businesses:

PwC India Family Business Survey (2016: 2021) has found that family businesses in the current complex external environment can survive, grow, and prosper if they exhibit resilience and agility. Additionally, it is paramount that family businesses pursue and progress on the path of sustainable development (UNCTAD- The Family Business Network Global Initiative 'Family Business for Sustainable Development', 2021). Family businesses have their peculiarities in terms of:

Dynamics of Family Business:

Governance issues

Diversification:

Organic and inorganic growth and scale-up

People Management:

Managing professional managers, family members with managerial responsibilities, negotiation

Succession Planning Models:

Internal conflicts, trust, expansion

Financial Planning:

Financial modelling, resource planning

Entrepreneurial Skills:

Sensing, exploring, and exploiting new opportunities both within and outside the existing organization

Career Pathways:

This course will prepare students to either join a family business or start a new business. After completing this program, they will be in a position to effectively pitch their ideas to potential investors as well as to incubators and accelerators. Additionally, the course encourages students to pursue career opportunities in industry.

- Next generation of family businesses

B.A. (HONS.)/ B.Sc. (HONS.) ECONOMICS

The JSGP undergraduate degrees in Economics are versatile and can lead to various employment choices while providing a student with vital skills for understanding and influencing economic outcomes. Programme graduates would be able to understand the interplay between economy, society and politics; evaluate economic problems through the lens of a global perspective while taking a local approach to solving them

Students can pursue either a B.A. (Hons) or a B.Sc. (Hons) as a four-year degree programme with or without research. The first year is foundational for both programmes and is the same for students from both streams. Students in their second year take some common courses and remaining courses from their respective streams. During the next two years, students read a mix of core and elective courses related to their chosen programmes. Both programmes offer Honours with Research as per the National Education Policy 2020.

A Bachelor of Science (B.Sc.) in Economics has a bit more emphasis on understanding economics analytically, mathematically, and empirically, while a Bachelor of Arts (B.A.) in Economics provides a bit more practical, and analytical knowledge and cutting-edge tools that allow students to focus on global issues related to economics, business and policy making. Both programmes provide a firm foundation in economic theories, econometric models, and ideas, enabling students to analyse and comprehend economic data and trends. Graduates of both B.Sc./B.A. work in finance, banking, consulting, government, research, think tanks, and other fields.

**Jindal School of
Liberal Arts & Humanities**
India's First Transnational Humanities School

B.A. (HONS.) LIBERAL ARTS & HUMANITIES

Liberal Arts is an innovative pedagogy focused on small classes, close faculty-student engagement, and a strong interdisciplinary foundation with specializations in specific subjects. The four-year degree will enable students to build a broad knowledge base and curate a basket of advanced-level courses through either a single or double major. A liberal arts training hones a student's critical and creative thinking to equip them with the ability to thrive in a rapidly changing professional setting, as well as pursue academic opportunities of their

interest. The holistic nature of the programme empowers students to take up a wide range of internships, field work based study and a capstone project.

Through the liberal arts curriculum, the student develops the skills to read, write, see and analyse the world from multiple perspectives. Learning through the lens of the more familiar disciplines, such as history, literature, mathematics, sociology and philosophy is enhanced and deepened through training in expressive arts, psychology, science and language. Understanding the power and limitations of technology, scientific thinking and developments in artificial intelligence are invaluable skills a BALH student will draw upon. Combining multiple disciplinary perspectives is especially exciting as students can create multidisciplinary majors, such as philosophy and technology, art and sociology, environment and politics, business and art.

DISTINCTIVE FEATURES

- Interdisciplinary foundation courses help students engage in a variety of social science and humanities subjects.
- Experiential learning with emphasis on discussion, debate and hands-on activities, and field work in Delhi/NCR and beyond.
- International possibilities for summer school and semester exchange in leading universities like Oxford University (UK), Harvard University (USA), London School of Economics (UK), Queen Mary London (UK), International College of Liberal Arts at Yamanshi (Japan).
- Students can choose from ten different majors: Economics; Environment and Sustainability; Visual Arts; Sociology and Anthropology; History; International Business; Literary Studies; Philosophy; Political Science and International Relations; Psychology. JSLH has also introduced two exciting new majors in Cultural and Creative Economies and Digital Humanities. Students can curate combinations of courses across these areas to build a unique study plan in a self-designed major.
- Option of a double major and a self-designed major that allow students to specialise in two areas of study or a specific area of interest. Past self-designed majors have included Art History and Literature; Environmental Psychology and Psychology and Expressive Arts.
- A unique four-year dual-degree programme with Rollins College, Florida; Deakin University, Australia and University of Sussex, U.K. whereby students have the option of studying two years at JSLH and the next two at our partner universities.

BACHELOR OF FINE ARTS (HONS.)

This degree programme incorporates a holistic and interdisciplinary approach to art education that integrates traditional skills and contemporary conceptual approach to art-making. Apart from an intensive studio practice and exposure to the foundations of liberal arts such as sociology, literature, philosophy and politics, students will participate in interdisciplinary seminars, develop communication skills and learn to use research tools in an intensive study project for their graduate thesis. In this manner, our students will be better equipped to contribute meaningfully to the contemporary art field. The student showcase held for every graduating batch will provide the opportunity to create their artistic portfolios, plan public display of their work, and prepare them for careers across the domains of visual art. This art education programme is grounded upon a rich visual art experience for JSLH undergraduate students.

DISTINCTIVE FEATURES

The key feature of the programme is an emphasis on study, skill, concept and creativity. Each course falls into one of these components which run through the programme, and equip student to engage with the contemporary art world.

- **Study** is the foundation for art creation. If traditionally study was understood as a visual analysis of the environment and its objects through sketches, drawing and clay modelling, we expand this limited perspective to include the study of space, colors, body, text, etc.
- **Skill** is a matter of contention among artists and art educators. It is either celebrated or criticised by practitioners and art teachers. We believe in the centrality of skills, but also in the need to rejuvenate its meaning and purpose. A skillful artist, nowadays does not only know how to draw, paint, sculpt or take photos, but also to amalgamate visuals and ideas, art-making processes and its conceptualization.
- **Concept** is central to contemporary art-making. In addition to courses on art history, theory and philosophy, the students will be exposed to the latest developments in the fields of cultural studies, critical theory and visual culture. Theory classes will include visits to art galleries and studios, and interaction with artists, curators, collectors and art dealers, which will give the students a first-hand exposure to the dynamics of the art world.
- **Creativity** binds all the segments of the programme. Study, Skill and Concept should help the students to develop their unique visual language and artistic concerns. The courses in this segment will be dedicated to both traditional and contemporary media such as painting, video art, sculpture, installation art, performance, digital art etc.

Course

B.A. (HONS.) PHILOSOPHY, POLITICS AND ECONOMICS

The Bachelor of Arts in Philosophy, Politics and Economics (PPE) is a four-year interdisciplinary programme designed for young thinkers interested in having a rigorous understanding of all three disciplines. It is aimed at understanding the big questions of what underpins the foundations of economics, politics and philosophy as independent disciplines and develop a comprehensive understanding of their inter-play to equip the student to make an impactful change in society. The programme will develop the student's capacity to identify and analyse increasingly complex real-world problems that disciplinary straight jackets cannot resolve.

Based out of two schools at the O. P. Jindal Global University, the Jindal School of Government and Public Policy (JSGP) and the Jindal School of Liberal Arts and Humanities (JSLH), the programme offers an opportunity to have the best of what both schools have to offer and develop a critical perspective on issues of the contemporary world from a Global South standpoint.

THE ADVANTAGES OF A PPE DEGREE

JINDAL SCHOOL OF LANGUAGES & LITERATURE
India's Global School of Language & Literature Studies

B.A. (HONS.) ENGLISH

The B.A (Hons.) English programme is a well-designed curriculum delivered through the Jindal School of Languages and Literature that encourages intensive engagement with literary and performative cultures expressed in the English language. While 'Literature in English' is not the same thing as world literature, the English language is by now arguably the most important medium of world literature. English is the language through which most people in the world today encounter, in translation, the literature and written heritage of the whole world. The undergraduate English degree the world over is known for its versatility and enduring value; although BA English is a pre-professional degree, it opens many doors to personal fulfilment and professional accomplishment.

WHAT ARE SOME PRACTICAL BENEFITS OF B.A. (HONS.) ENGLISH PROGRAMME ?

- Language and literature graduates are sought for many kinds of jobs in which clear communication and effective articulation are important. Students of English make impacts in several fields of media and communication, from publishing, journalism arts and entertainment, and beyond,
- English students are sensitive to the effects of evolving media and to the ways that social messages and cues to behaviour operate within different media, whether print media, film, television or the internet. English students understand communication and become effective communicators.
- Skills mastered by language and literature graduates can be combined with other analytical, critical thinking and vocational skills. English graduates who go on to postgraduate and professional study programmes find that their language proficiency and analytical abilities feed into their further training. English graduates find it very easy to move into quite specialized knowledge domains.
- In addition to expanding your mind and increasing your appreciation for spoken, written, and performed culture, studying the complex Anglophone cultural heritage could be of immediate relevance to the employment you take up after your formal education. You might even decide that you want to teach or do research in the field of English studies and work in a school, college or university.
